

CATALOGUE OF PROGRAMS AND COURSES

TAUGHT AT THE UNIVERSITY OF MINING AND GEOLOGY

"ST. IVAN RILSKI"

2023/2024

COURSES THAT CAN BE TAUGHT IN FOREIGN LANGUAGE

EQF Level 7 "Master"

Year*	Semester	Course unit code	Full name of the course unit	Form of assessment	Workload		Overall hours	Credits (ECTS)	Language of instruction	Course leader
					Lectures per week	Exercises / Seminars per week				
1	Autumn	132146	Geoarchaeology	E	1	1	60	5	ENG	Assoc. Prof. Dr. Pristavova
1	Autumn	132109	Gemmology	E	2	3	75	6	ENG	Assist Prof. Dr. Tzankova
1	Autumn	132137	Gem testing and grading	CA	2	2	56	5	ENG RUS	Assist. Prof. Dr. Tzankova
1	Spring	132111	Metamorphism and metamorphic processes	E	2	2	56	5	ENG	Assoc. Prof. Dr. Pristavova
1	Autumn	112227	Organic petrology	E	2	2	60	5	ENG	Assoc. Prof. Alexandar Zdravkov
1	Autumn	112235	Organic geochemistry	E	2	2	60	5	ENG	Assoc. Prof. Dr. Alexandar Zdravkov
1	Spring	112129	Mining geology	CA	2	2	60	5	ENG	Assoc. Prof. Dr. Stanislav Stoykov
1	Autumn	112121	GIS in Hydrogeology	E	3	2	75	5.2	ENG	Assoc. Prof. Dr. Kamen Popov
1	Spring	112124	Remote sensing in geology	E	2	2	60	5	ENG	Assoc. Prof. Dr. Kamen Popov
1	Autumn	332119	Microcontrollers	E	3	4	105	8	ENG, RUS	Assoc. Prof. Dr. Y. Gorbounov
1	Spring	332146	Reprogrammable systems	E	2	2	56	8	ENG, RUS	Assoc. Prof. Dr. Y. Gorbounov
1	Spring	282110	Chemical and physicochemical methods for water treatment	E	2	2	60	4	ENG, RUS	Prof. Dr. M. Panayotova
1	Spring	242127	Chemical and physicochemical methods for liquid waste management	E	3	2	75	6	ENG, RUS	Prof. M. Dr. Panayotova

Year*	Semester	Course unit code	Full name of the course unit	Form of assessment	Workload	Overall hours	Credits (ECTS)	Language of	Course leader	Year*
1	Spring	162131	Oil and gas storage	E	2	2	60	5	ENG, RUS	Assist. Prof. Dr. Lachezar Nikolov Georgiev
1	Autumn	162151	Design of gas supply systems	E	3	3	75	8	ENG, RUS	Assoc. Prof. Dr. Martin Minkov Boyadzhiev
1	Spring	172163	Biotechnologies for green energy generation		3	3	90	7		Assist. Prof. Dr. Polina Velichkova
1	Autumn	142132	Engineering Geophysics	E	3	3	90	7	ENG	Prof. DSc. Stefan Dimovski
1	Autumn	142102	Pre-Processing and Graphical Presentation of Geophysical Data	CA	3	3	75	5	ENG	Assoc. Prof. Dr. Maya Tomova
1	Autumn	142131	Methods of Solving Ill-Conditioned Problems in Geophysics	E	3	3	90	7	ENG	Assist. Prof. Dr. Christian Tsankov
1	Spring	142137	Exploration Geophysics	E	3	3	90	7	ENG	Prof. DSc. Stefan Dimovski
1	Spring	142140	Earth Magnetism and Geoelectrical Fields	E	3	3	90	7	ENG	Assist. Prof. Dr. Christian Tsankov
1	Spring	142141	Gravimetry	E	2	3	75	5	ENG	Assist. Prof. Dr. Christian Tsankov
1	Spring	142138	Petroleum Geophysics	E	3	3	90	7	ENG	Assoc. Prof. Dr. Maya Tomova
1	Autumn	122242	Application of GIS in landscape research	CA	1	4	75	6	ENG	Assist. Prof. Dr. Valentina Nikolova
1	Autumn	171126	Environmental Geology	E	2	3	75	6	ENG	Assoc. Prof. Dr. Ivan Dimitrov
1	Autumn	122141	GIS documenting and management of protected areas	E	2	3	75	6	ENG	Assist. Prof. Dr. Dimitar Sachkov
1	Autumn	122218	Special methods of 3D geological analysis	E	2	3	75	6	ENG	Assoc. Prof. Dr. Ivan Dimitrov
1	Autumn	122216	Geodynamic processes and phenomena	E	2	3	75	6	ENG	Assoc. Prof. Dr. Ivan Dimitrov
1	Autumn / Spring	252142	3D modeling and Virtual Reality (VR)	E		3	45	4	ENG	Assoc. Prof. Dr. Asparuh Kamburov
1	Autumn / Spring	252119	Global Navigation Satellite Systems (GNSS)	E	2	3	75	5	ENG	Assoc. Prof. Dr. Asparuh Kamburov
1	Autumn / Spring	252114	Server and Cloud GIS	E	2	2	60	4	ENG	Assoc. Prof. Dr. Asparuh Kamburov
2	Spring	252108	Mine surveying in underground mining	E	3	3	90	6	ENG	Prof. Dr. Stanislav Topalov, Assoc. Prof. Dr. Milena Begnovska Dr. Sergey Mihalev
2	Autumn	262133	Risks by Environmental Spread of Industrial Harmful Substances	CA	1	2	45	3	ENG, German	Assist. Prof. Dr. Nadezhda Kostadinova
2	Autumn	262131	Ergonomics	E	2	1		4	ENG, German	Assist. Prof. Nadezhda Kostadinova,

Year*	Semester	Course unit code	Full name of the course unit	Form of assessment	Workload	Overall hours	Credits (ECTS)	Language	Course leader	Year*
2	Spring	262113	Mine Aerology	E	2	2	60	3	ENG, German	Assist. Prof. Dr. Nadezhda Kostadinova, Assoc. Prof. Zahari Dinchev
1	Autumn	262108	Industrial Hygiene and Occupational Diseases	E	3	2	75	6	ENG, German	Assoc. Prof. Dr. Blagovesta Vladkova Assist. Prof. Dr. Dobri Dobrev
1	Autumn	262106	Industrial Safety - Process and Plant Safety	E	4	2	90	7	ENG, German	Assoc. Prof. Blagovesta Vladkova Assist. Prof. Dr. Dobri Dobrev
2	Spring	262122	Industrial Risk Management	E	2	3	75	7	ENG	Assoc. Prof. Blagovesta Vladkova Assist. Prof. Dr. Dobri Dobrev
1	Autumn	272129	Corporate Social Responsibility	E	3	1	60	5	ENG	Assoc. Prof. Dr. Vessela Petrova
2	Autumn	272143	Introduction to the principles of the circular economy	E	2	1	30	4	ENG	Assoc. Prof. Dr. V. Petrova
1	Autumn	272128	Management of the Environmental Impact	E	3	1	60	5	ENG	Assoc. Prof. Dr. Vessela Petrova
1	Autumn	272233	Organizational Behaviour	E	2	1	45	4	RUS	Assoc. Prof. Dr. Maria Fartunova
1	Spring	272138	Sociology of Management	E	3	1	60	5	RUS	Assoc. Prof. Dr. Maria Fartunova
1	Spring	272139	Standardization and Certification	E	2	1	30	3	ENG	Assoc. Prof. Dr. Vessela Petrova
2	Spring	272250	Technological Renovation and Globalization	CA	2	1	30	3	RUS	Assoc. Prof. Dr. Maria Fartunova
1	Spring	352119	Wärme- und Stoffübertragung= Heat and mass transfer	E	2	2	60	5	GER ENG	Assoc. Prof. Dr. E. Kraichev
2	Autumn	212141	Quality Control of the Production of Opencast Mines and Quarries	E	3	3	72*	6	ENG	Assist. Prof. Dr. Dimitar Kaykov
1	Autumn	122132	Diploma thesis preparation and defense	Geoinformatics				15	ENG	Assoc. Prof. Dr. Ivan Dimitrov

* According to the curriculum of the University of Mining and geology; ENG = English; RUS = Russian; E = Exam; CA = Continuous assessment

Year*	Semester	Course unit code	Full name of the course unit	Form of assessment	Workload	Overall hours	Credits (ECTS)	Language of	Course leader	Year*
4	Spring	232149	Pure Blasting Chemical Compounds and Raw Materials for the Production of Blasting Materials	E	2	3	42	7	ENG	Prof. PhD Valery Mitkov
1	Autumn	232154	Principles in the Theory of the Blasting Phenomenon and Blasting Principles in the Theory of the Blasting Phenomenon and Blasting Agents	E	3	3	45	7	ENG	Prof. PhD Valery Mitkov
1	Spring	232173	Blasting Operation Technology in Open Pits and in Underground Mines Blasting Operation Technology in Open Pits and in Underground Mines and in Special Blasting Operations	E	3	3	45	7	ENG	Assoc. Prof. PhD Peter Shishkov
1	Spring	212159	Blasting Operations Safety	E	2	2	60	5	ENG	Assoc. Prof. PhD Peter Shishkov
1	Spring	212161	Blasting Operation Technologies	E	2	2	60	5	ENG	Assoc. Prof. PhD Peter Shishkov
1	Spring	212160	Design of Blasting Operations	E	2	2	60	5	ENG	Assoc. Prof. PhD Peter Shishkov
2	Autumn	212165	Blasting works in underground conditions	E	2	2	60	5	ENG	Assoc. Prof. PhD Peter Shishkov
2	Autumn	212166	Blasting works in urban conditions	E	1	5	72	6	ENG	Assoc. Prof. PhD Peter Shishkov
2	Autumn	232135	Geotechnics	E	3	3	84	5	ENG	Ch. Assist. PhD Veselin Balev
4	Spring	232149	Pure Blasting Chemical Compounds and Raw Materials for the Production of Blasting Materials	E	2	3	42	7	ENG	Ch. Assist. PhD Zdravka Mollova
1	Autumn	232154	Principles in the Theory of the Blasting Phenomenon and Blasting Principles in the Theory of the Blasting Phenomenon and Blasting Agents	E	3	3	45	7	ENG	Ch. Assist. PhD Zdravka Mollova
2	Autumn	232136	Engineering Software	E	2	2	56	5	ENG	Assist. PhD Rafail Rafailov
2	Autumn	232169	Building Materials and Constructions	E	2	2	56	5	ENG	Assist. PhD Rafail Rafailov
1	Spring	332132	Intelligent control systems	E	2	3	75	6	ENG	Assoc. Prof. Dr. Mila Ilieva

* According to the curriculum of the University of Mining and geology; ENG = English; RUS = Russian; E = Exam; CA = Continuous assessment

EQF Level 6 "Bachelor"

Year*	Semester	Course unit code	Full name of the course unit	Form of assessment	Workload		Overall hours	Credits (ECTS)	Language of instruction	Course leader
					Lectures per week	Exercises / Seminars per week				
1	Spring	211125	Technology of mining	E	2	2	56	5	ENG	Assist. Prof. Dr. Dimitar Kaykov
3	Spring	211112	Draining and pit slope stability	E	2	2	56	4	FR RUS	Assoc. Prof. Dr. Evgeniya Aleksandrova
2	Autumn	311104	Materials sciences and technology of materials	E	3	3	84	7	ENG	Assoc. Prof. Dr. Minin, Assoc Prof. Dr. Nedyalkov
3	Spring	311111	Mineral Processing Machines	E	2	3	70	6	ENG	Assoc. Prof. Dr. Minin, Assoc. Prof. Dr. Nedyalkov
3	Autumn	311109	Manufacturing Technologies and Machine Tools	E	2	3	70	5	ENG	Assoc. Prof. Dr. Nedyalkov
3	Spring	311112	Computer Dynamical Analysis of Machines	E	1	2	42	5	ENG	Assoc. Prof. Dr. Nedyalkov
4	Spring	311123	Computer Strain-Strength and Modal Analysis of Machines	E	2	2	56	4	ENG	Assoc. Prof. Dr. Nedyalkov
3	Spring	171173	Methods and technologies for production of biogas	E	1		28	5	ENG	Assoc. Prof. Dr. Angelov
4	Spring	241117	Chemical Methods in Mineral Processing and Recycling	E	3	3	60	7	ENG	Prof. Dr. M. Panayotova
2	Spring	281102	Analytical Chemistry	E	2	3	70	8	ENG	Assoc. Prof. Dr. Mintcheva
2	Spring	281105	Hydrochemistry	E	2	3	56	7	ENG RUS	Prof. Dr. M. Panayotova, Assist Prof. Dr a. Chanachev
3	Spring	291107	Instrumental methods for gas analysis	E	2	2	42	6	ENG	Assoc. Prof. Dr. Mintcheva
2	Autumn	281103	Organic Chemistry	E	2	4	84	7	ENG	Assist. Prof. Dr. Gicheva, Assist Prof. Dr a. Chanachev

Year*	Semester	Course unit code	Full name of the course unit	Form of assessment	Workload		Overall hours	Credits (ECTS)	Language of instruction	Course leader
					Lectures per week	Exercises / Seminars per week				
2	Autumn	281104	Physical Chemistry	E	2	3	70	6	ENG RUS	Prof. Dr. M. Panayotova, Assist Prof. Dr a. Chanachev
4	Autumn	281106	Protective metal coatings	E	2	2	42	6	RUS ENG	Assoc. Prof. Dr. Kanazirski; Prof. Dr. Panayotova
4	Spring	281108	Corrosion and corrosion protection in construction work	E	3 (10 weeks semester)	4 (10 weeks semester)	70	6	ENG RUS	Prof. Dr. M. Panayotova
1	Autumn	281101	General Chemistry	E	2	2	56	6	ENG RUS. GER	Assoc. Prof. Dr. Kanazirski; Assist Prof. Dr a. Chanachev
3	Autumn	331117	Microprocessors	E	2	2	56	5	ENG, RUS	Assoc. Prof. Dr. Y. Gorbounov
2	Spring	331112	Digital Design	E	2	3	70	6	ENG, RUS	Assoc. Prof. Dr. Y. Gorbounov
2	Spring	331106	Fundamentals of Automations	E	2	2	56	5	RUS	As. V. Dzharov
2	Autumn	341107	Electrical materials	E	2	2	56	6	ENG	Assoc. Prof. Dr. T. Hristova
2	Spring	341103	Electrical engineering	E	2	2	56	5	ENG	Assoc. Prof. Dr. T. Hristova
3	Spring	111105	Coal geology	E	3	3	84	7	ENG	Assoc. Prof. Dr. Alexandar Zdravkov
3	Spring	111153	Geology and Geochemistry of Fossil Fuels	E	2	2	56	5	ENG	Assoc. Prof. Dr. Alexandar Zdravkov
3	Autumn	111102	Fundamentals of geochemistry	E	3	2	70	6	ENG	Assoc. Prof. Dr. Stanislav Stoykov
3	Autumn	111141	Geochemistry	E	2	3	70	6	ENG	Assoc. Prof. Dr. Stanislav Stoykov
4	Autumn	111131	Industrial Types Deposits of Mineral Resources	E	2	2	56	6	ENG	Assoc. Prof. Dr. Stanislav Stoykov

Year*	Semester	Course unit code	Full name of the course unit	Form of assessment	Workload		Overall hours	Credits (ECTS)	Language of instruction	Course leader
					Lectures per week	Exercises / Seminars per week				
2	Spring	111118	Mineral Resources	E	2	1	45	3	ENG	Assoc. Prof. Dr. Stanislav Stoykov
3	Autumn	111117	Geology and Exploration of Mineral Deposits	E	2	2	56	5	ENG	Assoc. Prof. Dr. Stanislav Stoykov
3	Spring	111104	Geology of mineral deposits	E	3	3	84	7	ENG	Assoc. Prof. Dr. Stanislav Stoykov
4	Autumn	111108	Deposits of industrial minerals and rocks	E	3	3	84	7	ENG	Assoc. Prof. Dr. Stanislav Stoykov
1	Autumn	121143	Prospecting and Exploration of Mineral Deposits	E	3	1	56	6	ENG	Assoc. Prof. Dr. Stanislav Stoykov
4	Spring	111144	3D Geological Modelling	CA	0	4	406	3	ENG	Assoc. Prof. Dr. Kalin Ruskov
2	Spring	111103	Fundamentals of geostatistics	E	2	2	56	6	ENG	Assoc. Prof. Dr. Kalin Ruskov
3	Spring	112121	Geographic information systems - GIS	CA	1	2	42	4	ENG	Assoc. Prof. Dr. Kamen Popov
1	Spring	271116	Economics	E	3	3	84	9	RUS	Prof. Dr. Emil Dimov
2	Spring	271104	Economics and Finances	E	2	1	42	4	RUS	Prof. Dr. Emil Dimov
4	Autumn	271123	Entrepreneurship Culture	E	3	2	70	6	RUS	Assoc. Prof. Dr. Maria Fartunova
4	Autumn	271102	Human Resource Management	E	3	2	70	7	RUS	Assoc. Prof. Dr. Boryana Trifonova
3	Spring	271122	Project Management	E	3	2	70	8	ENG	Assoc. Prof. Dr. Borislava Galabova

Year*	Semester	Course unit code	Full name of the course unit	Form of assessment	Workload		Overall hours	Credits (ECTS)	Language of instruction	Course leader
					Lectures per week	Exercises / Seminars per week				
4	Autumn	271225	Technology Renewal and Social Dynamics	E	3	1	56	5	RUS	Assoc. Prof. Dr. Maria Fartunova
1	Spring	161114 161115 (CP)	Development and exploitation of oil and gas fields, Part II - Development of oil and gas fields with CP	E	5	5+1(CP)	110	9	ENG, RUS	Assist. Prof. Dr. Lachezar Nikolov Georgiev
1	Spring	161116 161117 (CP)	Transport and Use of the Oil and Gas and CP	E	5	5+1(CP)	110	8	ENG, RUS	Assoc. Prof. Dr. Martin Minkov Boyadzhiev
1	Spring	161106	Machines and Equipment for Oil and Gas Extraction and Transport	E	2	2	56	8	ENG, RUS	Assoc. Prof. Dr. Martin Minkov Boyadzhiev
1	Autumn	131101	Mineralogy and Crystallography	E	3	3	70	6	ENG RUS	Assist. Prof. Dr. Dr.Tzankova Assoc. Prof. Dr. Pazderov
1	Autumn	131139	Fundamentals of Mineralogy	E	2	2	56	5	ENG RUS	Assist. Prof. Dr.Tzankova Assoc. Prof. Dr. Pazderov
1	Spring	131325	Fundamentals of Gemology	CA			42	3	ENG RUS	Assist. Prof. Dr.Tzankova
2	Spring	131332	Environmental Geochemistry	CA			56	4	RUS	Assoc. Prof. Dr. Pazderov
2	Spring	131103	Mineralogy and petrography	E	3	3	84	6	ENG RUS	Assist. Prof. Tzankova, Assoc. Prof. Dr. Pazderov
2	Spring	131104	Metamorphic Petrology	E	2	2	56	5	ENG	Assoc. Prof. Dr. Pristavova
1	Spring	131144	Petrography	E	3	3	84	8	ENG	Assoc. Prof. Dr. Pristavova
1	Autumn	141101	Fundamentals of Geophysics	E	2	3	70	8	ENG	Assoc. Prof. Dr. Maya Tomova
3	Autumn	141103	Gravitational Methods in Geophysics	E	4	4	112	10	ENG	Assist. Prof. Dr. Christian Tsankov
3	Autumn	141106	Seismic Methods in Geophysics	E	4	4	112	10	ENG	Assoc. Prof. Dr. Maya Tomova
3	Spring	141105	Magnetic Methods in Geophysics	E	4	4	112	10	ENG	Assist. Prof. Dr. Christian Tsankov
3	Spring	141115	Applied Geophysics	E	2	2	56	5	ENG	Prof. DSc. Stefan Dimovski
4	Autumn	141108	Remote Sensing Methods in Geophysics	E	2	2	56	5	ENG	Assist. Prof. Dr. Christian Tsankov

Year*	Semester	Course unit code	Full name of the course unit	Form of assessment	Workload		Overall hours	Credits (ECTS)	Language of instruction	Course leader
					Lectures per week	Exercises / Seminars per week				
4	Spring	141109	Borehole Geophysics	E	6	6	120	12	ENG	Assoc. Prof. Dr. Maya Tomova
2	Autumn	121153	Paleontology and Stratigraphy	E	2	3	70	8	ENG	Assoc. Prof. Dr. B. Valchev
1	Spring	121120	Fundamentals of Cartography	E	2	2	56	7	ENG	Assist. Prof. Dr. Valentina Nikolova
2	Spring	121121	Introduction to geological geometric analysis	E	3	3	84	8	ENG	Assoc. Prof. Dr. Ivan Dimitrov
3	Spring	121122	CAD systems in geology	CA	1	3	56	6	ENG	Assist. Prof. Dr. Dimitar Sachkov
3	Autumn	121125	Geoinformation analysis of the terrain	E	2	2	56	5	ENG	Assist. Prof. Dr. Valentina Nikolova
3	Autumn	121150	GIS and spatial analyses	CA	1	3	56	5	ENG	Assist. Prof. Dr. Valentina Nikolova
3	Autumn	121112	Historic and regional geology	E	3	3	84	6	ENG	Assist. Prof. Dr. B. Valchev
3	Spring	121119	3D geological mapping	E	3	4	98	10	ENG	Assoc. Prof. Dr. Ivan Dimitrov
3	Autumn	121115	GIS documenting of linear infrastructural objects	CA	1	4	70	7	ENG	Assist. Prof. Dr. Dimitar Sachkov
4	Autumn	121139	Geological information processing in GIS	CA	1	3	56	5	ENG	Assist. Prof. Dr. Dimitar Sachkov
4	Spring	121157	Geological heritage	E	2	3	50	4	ENG	Assist. Prof. Dr. B. Valchev
4	Spring	111251	Statistical analysis of geological information	E	3	3	60	4	ENG	Assoc. Prof. Dr. Kalin Ruskov
3	Spring	351109	Wärmetechnik = Heat technology and Heat engineering or	E	3	2	70	7	GE, ENG	Assoc. Prof. Dr. E. Kraichev
3	Autumn	351110	Thermodynamik= Thermodynamics and Internal Combustion Engines	E	2	2	56	6	GE, ENG	Assoc. Prof. Dr. E. Kraichev
3	Spring	261104	Mine Ventilation	E	2	2	60	4	ENG, German	Assist. Prof. Nadezhda Kostadinova, PhD Assoc. Prof. Zahari Dinchev

Year*	Semester	Course unit code	Full name of the course unit	Form of assessment	Workload		Overall hours	Credits (ECTS)	Language of instruction	Course leader
					Lectures per week	Exercise/ Seminars per week				
4	Spring	261102	Occupational Health and Safety	E	2	2	60	4	ENG, German	Assoc. Prof. Dr. Blagovesta Vladkova, Assist. Prof. Dr. Dobri Dobrev
2	Autumn	361111	Computer Networks and Communications – Part I	E	2	3	70	7	ENG	Assoc. Prof. Dr. Veselin Hristov, Assist. Prof. Kremena Arsova
4	Spring	361126	Protecting of Information and Information Security	E	3	3	60	7	ENG	Assoc. Prof. Dr. Yordanka Anastasova, Assist. Prof. Ivan Drankov
	Autumn/ Spring	221100	Foreign language	CA	-	3	42	3	English, French, German Spanish, Russian	Chief Assist M. Hristova - head of the foreign languages dept.
3	Autumn	321101	Electrical Apparatus	E	2	3	70	6	RUS	Assoc. Prof. PhD Kiril Stalinov Dzhustrov
4	Autumn	321135	Relay Protection	E	2	3	70	5	RUS	Assoc. Prof. PhD Kiril Stalinov Dzhustrov
4	Autumn	321109	Explosive electrical equipment production	E	2	2	56	4	RUS	Assoc. Prof. PhD Kiril Stalinov Dzhustrov
3	Spring	231101	Underground Construction	E	2	3	42	6	GER	Prof. PhD Pavel Pavlov
4	Spring	231119	Tunnelling Mine Construction	E	3	4	40	6	GER	Prof. PhD Pavel Pavlov
3	Autumn	231120	Construction of Underground Facilities	E	2	1	45	3	GER	Prof. PhD Pavel Pavlov
3	Autumn	231115	Blasting Equipment and Technology	E	3	3	84	7	ENG	Prof. PhD Valery Mitkov
3	Autumn	231114	Structural Mechanics of Underground Equipment	E	3	2	70	5	ENG	Assoc. Prof. PhD Ivan Mitev
4	Autumn	231104	Underground Urban Infrastructure	E	3	3	84	7	ENG	Assoc. Prof. PhD Ivan Mitev
3	Spring	231109	Soil Mechanics and Foundation	E	3	4	98	9	ENG	Assoc. Prof. PhD Ivan Mitev
3	Spring	231122	Mine Construction	E	2	3	42	7	ENG	Ch. Assist. PhD Veselin Balev
2	Spring	351136	Rock Mechanics	E	2	2	56	5	ENG	Ch. Assist. PhD Veselin Balev
3	Autumn	231115	Blasting Equipment and Technology	E	3	3	84	7	ENG	Ch. Assist. PhD Zdravka Mollova
4	Autumn	231111	Reinforced Concrete	E	3	2	70	6	ENG	Assist. PhD Rafail Rafailov
4	Autumn	231171	Course project in Reinforced Concrete	E		1	14	2	ENG	Assist. PhD Rafail Rafailov
3	Autumn	231114	Structural Mechanics of Underground Equipment	E	3	2	70	6	ENG	Assist. Vladimir Penev
3	Spring	231109	Soil Mechanics and Foundation	E	3	4	98	9	ENG	Assist. Vladimir Penev
1	Spring	341104	Electronic Devices in Computer Technologies	E	2	2	56	5	ENG	Assoc. Prof. Dr. Mila Ilieva
2	Autumn	341106	Electronics	E	2	2	56	6	ENG	Assoc. Prof. Dr. Mila Ilieva

Practical trainings at Bachelor level

Year*	Course unit code	Full name of the course unit	Form of assessment	Workload Overall hours	Hours	Language of instruction	Course leader
2	121128	Paleontology and Stratigraphy	CA	3 days	18	ENG	Assist. Prof. Dr. B.Valchev
2	121129	Structural geology and Geotectonics	CA	3 days	18	ENG	Assoc. Prof. Dr. Ivan Dimitrov
3	121130	Field geology	CA	10 days	60	ENG	Assoc. Prof. Dr. Ivan Dimitrov
3	121149	Regional geology and geological phenomena	CA	8 days	48	ENG	Assist. Prof. Dr. B. Valchev
3	141124	Practical Training in Gravitational Methods in Geophysics	CA	3 days	18	ENG	Assist. Prof. Dr. Christian Tsankov
3	141126	Practical Training in Magnetic Methods in Geophysics	CA	3 days	18	ENG	Assist. Prof. Dr. Christian Tsankov
3	141127	Practical Training in Seismic Methods in Geophysics	CA	3 days	18	ENG	Assoc. Prof. Dr. Maya Tomova
3	141128	Practical Training in Applied Geophysics	CA	3 days	18	ENG	Assist. Prof. Dr. Christian Tsankov
2	341112	Practice on electrical machines, electronics and electrical measurements	CA	3 days	18	ENG	Assoc. Prof. Dr. Mila Ilieva

* According to the curriculum of the University of Mining and geology; ENG = English; RUS = Russian

MASTER PROGRAMS THAT CAN BE TAUGHT IN ENGLISH

Name of the program: *ECOTECHNOLOGY AND ENVIRONMENTAL PROTECTION*

EQF Level of the program: 7

The ISCED 2013 field of education: 052

Qualification awarded: *ECOLOGIST*

Description of the program:

The Master's Programme in "Ecotechnologies and Environmental Protection" prepares for future career highly qualified specialists ready to meet the contemporary challenges of the industry and society. In addition to the solid academic knowledge, the programme allows to the students to develop a variety of practical skills outside of the university thanks to our close partnerships with authoritative and international companies in the branch. The senior graduate students who chose this specialty will be trained in the environmental impact of the energy and mineral industry sectors on the environment as well as in the implementation of efficient and environmental friendly ecotechnological solutions, adapted to the local social conditions for sustainable industrial development and economic growth. The programme covers varied aspects of the latest methods of the sustainable engineering that can reduce the damage on the ecosystems, remediate the polluted water and soil, manage the wastes and ensure conservation of the biodiversity. All kinds of manufactures wish to hire such specialists, because all of these manufactures must satisfy strict environmental regulations and be sure that they deal with the best eco-friendly practices. The educational approach is multidisciplinary, involving close cooperation between European and world-famous scientists with high reputation, together with a numerous experts and representatives of the business society. Graduates of this specialty can find jobs as experts-ecologist in various industries, at the market for ecotechnology and environmental innovations, in the scientific and governmental institutions in the member countries of European Union as well as in the whole world.

Key learning outcomes:

This Master's degree expands students' knowledge and this is facilitated by the opportunity to obtain specialised training in some of the above subjects by selecting the respective set of optional course units. The graduates of this degree are able to design and organise environmental protection activities and to exert administrative control in this direction, as well as to perform as engineers and ecologists in various branches of industry and agriculture, as experts in state institutions, non-governmental organisations, and commercial entities acting in the area of ecology and environmental protection, and also as research workers in the field of ecology and environmental protection. Training in this degrees is carried out along curricula that comply with those of the leading universities of EU member states.

The graduates of this course of studies can be successfully employed on positions connected with environmental protection activities in the geoexploration, mining, and energy branches of industry, in the chemical and pharmaceutical industries and in agriculture, as well as such in the field of mineral processing. They can also find occupational fulfilment as ecologists in district authorities and municipalities, in the Regional Inspectorate of the Environment and Water (RIEWs), or as state employees in institutions whose scope of power is ecology.

			<i>Total number of hours and credits for the entire training course:</i>				870	85

Name of the program: GEOLOGY AND GEOINFORMATICS

EQF Level of the program: 7

The ISCED 2013 field of education: 0532

Qualification awarded: Master in geoinformatics

Description of the programme:

This master's program is centered around the use of geoinformatics in earth science fields. It is particularly relevant to the subject of environmental geology. The programme prepares students to become experts in geological prospecting and ecological research with emphasis on soil and water management. The courses are designed to teach, complex geological and geomorphological analyses using software tools, documentation of infrastructure sites, mapping of the geochemical and geophysical parameters of the environment, computer modeling of natural processes, forecasting and monitoring of natural risks and procedures for management of protected areas, such as national parks, geoparks and etc. They are designed to develop abilities, useful for doctoral studies, and/or professional career in the industry. Since the main tool used is GIS software, upon completion of the program, the candidates will be most sought of as GIS specialists in mining and prospecting companies and as variety of GIS related technicians in environment related business enterprises.

Key learning outcomes:

By the end of this Master programme graduates will be able to:

- Define and comprehend fundamental concepts, practices and advances in geoinformatics;
- Acquire, process and visualize spatial data in the field of geology, environmental protection and geotourism;
- Know and analyse spatial and functional dependencies between objects and phenomena (particularly related to geological prospecting; geodynamic events; geological-geomorphological hazards and protected areas) and to interpret the results of the analysis;
- Do individual researches for solving different tasks in geology, environmental protection and landscapes;
- Know main remote sensing systems and apply remote sensing methods;
- Apply techniques of spatial analyses, 3D modelling and mapping;
- Demonstrate confidence in working with GIS and in solving of different software problems by using software help or information in the websites;
- Show advanced skills in using computer technology for input and analysis of spatial data;
- Demonstrate organizational skills in file and database management;
- Effectively communicate the results of their research and master's theses

PhD PROGRAMS THAT CAN BE TAUGHT IN ENGLISH

Name of the program: *SYSTEMS AND DEVICES FOR ENVIRONMENTAL PROTECTION*

EQF Level of the program: 8

The ISCED 2013 field of education: 052 Environment

Qualification awarded: PhD

Description of the program:

The international PhD course in „Systems and devices for environmental protection“ at the University of Mining and Geology „St. Ivan Rilski“-Sofia, Bulgaria prepares for future careers motivated specialists in ecology and ecological biotechnology, who are interested particularly in the modern environmental challenges of the industry and society. In addition to the solid professional knowledge, the program training allows to develop a variety of practical skills for the searching of best and applicable engineering solutions of various problems related to the environmental protection and conservation. The PhD fellows involved in this specialty will be educated in the impact of the energy and mineral industries on the environment, the biosensors technology and analytical tools for ecological monitoring and assessment, as well as the preparation of scientific reports and set of efficient strategies for sustainable industrial growth and economic development.

Key learning outcomes:

The general key learning outcomes of the course program are the possibilities for management of numerous types of system and devices, which are widely used to improve and keep in good health the natural ecosystems in conditions of industrialization, where the processes are conducted with high risk of potential release of wastes and toxicants. Thus, the graduates have a broad scopes for finding jobs, as highly qualified experts in many industrial branches, researchers in academic or scientific institutions, non-profit organizations, advisors in governmental institutions, mainly in European Union but also in the other countries, which require high standarts for environmental protection and control.

Leading department: *Department Engineering Geoecology*

Program director: *Assoc. Prof. A. Angelov, PhD*

Name of the program: METHODS AND TECHNIQUE OF GEOLOGICAL STUDIES

EQF Level of the program: 8

The ISCED 2013 field of education: 0532 Earth Sciences

Qualification awarded: PhD

Description of the program:

The PhD program in the scientific specialty “Methods and Technique of Geological Studies” at the Department of Applied Geophysics is designed to prepare highly qualified specialists in the field of structural geological-geophysical studies related to the prospecting, exploration and exploitation of mineral resources. At the University of Mining and Geology “St. Ivan Rilski”, unlike other PhD programs that are related to fundamental geophysical and geological subjects, the efforts are mainly focused on solving problems directly related to the implementation of state and/or corporate projects, focusing the specifics in preparation and training of PhD students, first and foremost, in practical terms. Particular attention is paid to the near-surface geophysical studies in industrial, civil and mining construction.

The PhD students receive the necessary theoretical and practical training, perfecting and concentrating their knowledge in the possibilities for application of field, borehole and remote geophysical methods in all stages of prospecting, exploration and exploitation of mineral resources, as well as in solving engineering, hydrogeological and environmental problems.

Graduates of the PhD program in the scientific specialty "Methods and Technique of Geological Studies" at the Department of Applied Geophysics find professional realization in the design and conduct of geophysical research in the mentioned fields, as well as in fields with close or similar activity. They can work in scientific and scientific-designing institutes and laboratories, in universities as lecturers and associates. They can apply for leading positions as executives or experts in proper state and economic structures, or successfully implement themselves through their knowledge in modern computer technology.

Key learning outcomes:

The PhD candidate acquires problem solving ability and ability to work in a team environment, comprising specialists of various expertise.

This is achieved by solving real problems of both scientific and practical importance, related to some geological or environmental procedure, which reflects societal needs, such as mineral prospecting and mitigation of environmental damage, water management or soil management. The problem solving is projected in a time frame that is sufficient to accomplish extensive literatures review, data acquisition, analysis and presentation of the results. The presentation of the results is achieved by paper writing and thesis completion and defense.

The main problem, solved in the PhD program, is selected to be of multidisciplinary nature so interaction with specialists of different field is needed on every step of the work flow.

These specialists, acting as consultants, are selected from the pool of the University of Mining and Geology - Sofia, the Sofia University and the institutes of the Bulgarian Academy of Sciences. Training courses, workshops and laboratory time in relevant European universities are also envisaged. Acquaintance with and industry executives from relevant fields will most likely be made as some point in the program.

As an obligatory outcome at least three scientific papers have to be published as in one of them the candidate should be the sole author.

In addition to the problem-solving, adequate skills in scientific presentation of the results are also specifically targeted in the learning program. The presentation will encompass oral, writing and graphic presentation skills. The graphic presentation usually includes high level 3D visualization using GIS or CAD software, coupled with geometry methods from the fields of geodesy, structural geology and other earth sciences.

As a rule the PhD program has three obligatory exams as the number of exams can be increased depending on the topic and the needs of the candidate. One of these exams is in technical English, for nonnative English speakers, and the rest are on topics strictly related to the topic of the thesis.

Socialization in the Bulgarian environment is usually achieved by using accommodation on the student's town in Sofia, where other students and young people live.

Name of the program: *COMPUTER TECHNOLOGY IN ENGINEERING*

EQF Level of the program: 8

The ISCED 2013 field of education: 06 Information and Communication Technologies

Qualification awarded: PhD

Description of the program:

The doctoral program develops skills that allow students to become experts with integrated technical, information and management training for mining and other industries, combining knowledge and skills in the following main areas of application of information and computer technology: development strategy, innovation , information service and implementation of modern computer systems for monitoring and management in the industry.

Successfully defended doctoral students can solve a wide range of information and management tasks in a globalizing market economy, characterized by a dynamically changing environment, significant risk in the implementation of complex information systems, the constant movement of raw material prices and limited resources, developed competition: wide application of computer and information technologies and the urgent need for restructuring and integration of the economy in the international economic space.

Key learning outcomes:

The intellectual qualities and practical skills that are acquired during the training of doctoral students are related to:

- deepening the knowledge related to the modern theoretical and methodological principles for research in the scientific fields, related to the application and finding of specific computer technological and technical solutions and information management technologies in the organization and management of processes;
- study, introduction and optimization of new and constantly evolving technologies, methods, techniques and tools in computer, communication and information technologies and their application in specific business organizations;
- study and introduction of new, more progressive and sophisticated approaches, techniques and tools and introduction of innovative technological computerized solutions;
- formation of initiative, innovation, competence and complex skills for conducting independent research and experimental activities, as well as knowledge and skills for independent research and teaching activities;
- Achieving very good theoretical and applied preparation for participation in national, international and regional scientific forums, competitions and projects.

In the process of training doctoral students master not only the specific approaches, methods, principles and techniques in information and computer technology, but also can choose the best ones for solving specific problems in the respective business organizations.
