

Cad Technician (чертожник)

Heros Design EOOD are a Design Consultancy that design Telecoms Base Station (Cell) sites.

CAD skills should be such that you will need minimal supervision to work productively with the software. Experience within the Civil, Structural or Telecoms sector would be advantageous, however, Architectural Technicians or those with other technical roles involving AutoCAD will also be considered. Recent University graduates and those looking for work placements are welcome to apply. For outstanding candidates Remote working is an option. This will only be following successful completion of a 3-month training period in our Ruse office.

Key Responsibilities

Working within the Design team, you will be required to take customer specifications, and produce drawings for use in Planning Applications and for Build. You will produce site plans, elevations and construction drawings based upon Engineer surveys, site dimensions and photographs.

Requirements

Proficiency using AutoCAD

Good command of English language, both written and spoken. Please do not apply otherwise.

Ability to work to deadlines

Organised and systematic approach with attention to detail, accuracy and quality

Experience in a technical design based office role (working within a design team)

Personal development

This position offers excellent opportunities for Career and salary progression in what is a specialist industry, as well as a chance to gain valuable and transferable experience in design.
